CRIMINAL INTELLIGENCE.

Prize Fight.

The Second district police, yesterday orning, saw a crowd of darkies going out to a yearnt field, beyond the Charles ton Railroad, and suspecting something wrong, followed them. Watching them from a distance, they saw the crowd form a ring, and two of the party, after much loud talk, enter it, stripped to the buff, and threw themselves into position were ready for the " mill" to commence, the police descended on the crowd and made a general scatteration. The two principals, smelling danger from afar, made good their escape, but seven of the aiders and abertors were captured. Later in the day, the police, who had meanwhile learned their names, captured one of the principals.

When Commissioner Richards held

court yesterday evening the belileose individual was brought up for examinalady, and Marshall had sworn that they must fight it out then and there, or he would shoot him. Bather than be shot he concluded to "fight it out," "'cause," said he, "you know that here, in this

office of the stomach is to convert the food into a cream-like semi-fluid, called CHYER This is eff cted partly by the action of a solven Messry. Aste & Co. These oysters are unequaled in flavor or size, and are both chanical movement of that organ, which CHURNS, as it were, the dissolving aliment The CHYME passes from the stomach into th duodenum, or entrance to the bowels, where duodenum, or entrance to the bowels, where it is subjected to the action of the bile, and the nutritious portion of it converted into a finid called Chyle, which eventually become blood. Now, it is evident, that if the great solvent, this guaric jules, is not produced in sufficient quantity, or if the mechanical action of the stomach is not sufficiently brisk, the first process of digestion will be but imperfectly performed. It is also clear that if the liver, which plays such an important part in changing the nourishing portion of the chyme into the material of the blood, is congested, or in any unatural condition, the second process will not be thoroughly accomplished. The result of the two fulls as is dyspessa, complicated with bilinosness.

bilinosmess.

The mode in which HOSTETTER'S BITTERS operate in such cases is this: They invigorate the cellular membrane of the stomach, which evolves the gastric juice, thereby insuring an ample sufficiency of the fluid to completely dissolve the food. They also acceleration of the mechanical movement necessary to return the food to a homogeneous mass. They nerves of the stomach, causing an acceleration of the mechanical movement necessary to reduce the food to a homogeneous mass. They also act specifically upon the liver, strengthening it, and so enabling it to produce an ample and regular supply of bile, for the purpose of converting the nutrillous particles of the CHYME into CHYLE, and promote the passage through the bowels of the useless debris. In this way HOSTETIER'S BITTERS core dyspepsia and liver complaint. The explanation is plain, simple, philosopulcal and TRUE.
